Doleta LTD is one of the most modern and innovative windows and doors manufacturer both in Lithuania and Europe and is highly acknowledged for its wood and wood-aluminum windows, doors, facades, winter conservatories.

Since 1953 Doleta products have reached different parts of the world, from east: Japan, Russia, Kazakhstan,

Ukraine to west: Austria, Germany, England, Ireland, the USA; from south: Spain, France, Italy to north: Norway, Denmark, Greenland and many others.

Cooperation with architects and partners from different countries, constantly determine the demand of non-standard products and solutions. A team of over 20 constructors have

designed and developed 35 different windows/doors constructions, which explains why the company is the most innovative window manufacturer and window fashion developer.

We export over 3 quarters of our production.

■ Russia
 ■ Ukraine
 ■ Kazakhstan
 ■ Ireland
 ■ United Kingdom
 ■ Latvia
 ■ Other

At the end of 2007 an extension to the factory with high-end machinery and equipment was opened. Having 20000 m² of industrial area and over 176 workers, the company is able to produce 10000 m² of windows and doors per month.

With the extension to the factory in 2007 a new and so far unique automatic impregnation and drying equipment was launched where individual window parts are separately soaked twice with ecological materials, dried automatically and then assembled. Following the automatic impregnation, they go to a painting line where they are coated with three layers of ecological paint. This process ensures better wood and color protection, durability and longevity. What is more the surface reached “furniture” like quality.

Certificates:

Applications of modern technologies, components and finishing materials of leading manufacturers, allow the company to win the top quality of its products.

Windows and doors are an expression of each person's individual lifestyle. There are a lot of window manufactures to choose from but only few can guarantee a unique product with its durability, longevity and energy efficiency. Doleta develops, manufactures and improves its products, which meet a diverse range of needs and demands and have the top quality. The company has an exclusive unit of specialists, including art, design, security, and construction who work hard to meet the highest requirements of customers.

Wood is one of the oldest materials on Earth and the fact that it has passed the test of time for thousands of years is evident proof of its unparalleled advantages. Wood stands out from other building materials for its best value insulation, durability and beauty. Due to its unique suitability for processing, this natural material may be manufactured of any shape. As a renewable raw material, wood also fully complies with modern environmental protection and combat against climate change. All the company's products are eco-friendly.
